Central Bank of Ireland – Data Visualisation Style Guide

Version 1.0 // Updated 17 October 2024

Central Bank of Ireland – Confidential

Central Bank of Ireland - CONFIDENTIAL

Why A Style Guide?

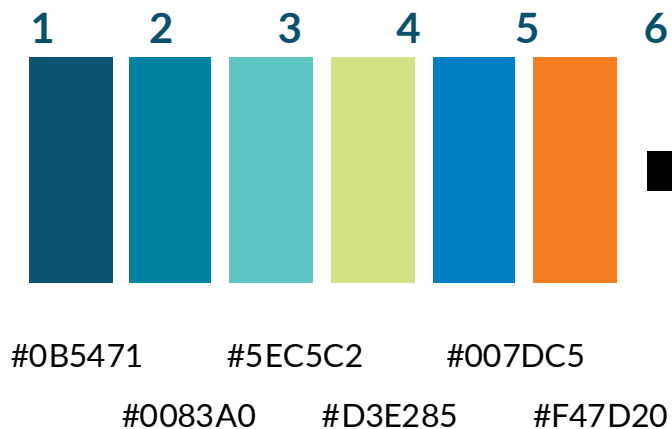

The primary reason in establishing a data visualisation style guide is to ensure consistent standards for formatting and designing data visualisations across the bank. Each chart should follow the specific colour ordering established in this document.

Note: On some pages, the visuals have been minimised to ensure multiple charts per page. In practice, visuals should follow the golden ratio or width to height ratio of 8 x 4.94 & a DPI of 600. For social media posts, the formatting is as follows: width = 31.74 centimetres & height = 12.1 centimetres with a DPI of 600.

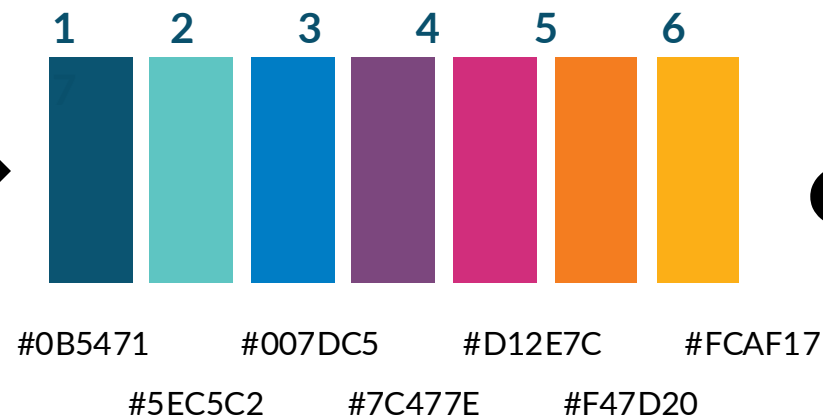

Colour Scheme:

Old:

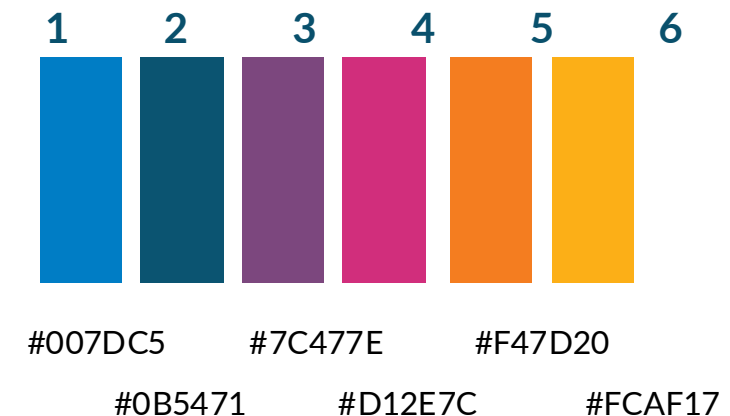

Qualitative:

&

Converging:

Note: The **Qualitative** palette is to be used when different categorical variables (nominal) have no obvious ordering.

Note: The **Converging** palette is to be used when different categorical variables (ordinal) do have an obvious ordering.

Figure Legends:

If possible, try to **EXCLUDE** figure legends.

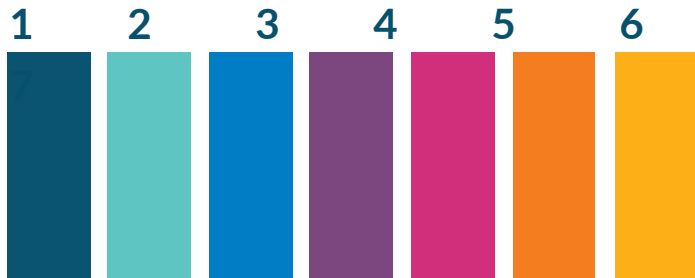

Instead, label data directly in a logical ordering at the right-hand side of the chart.

Sometimes this may be more difficult to achieve in practice (particularly with R).

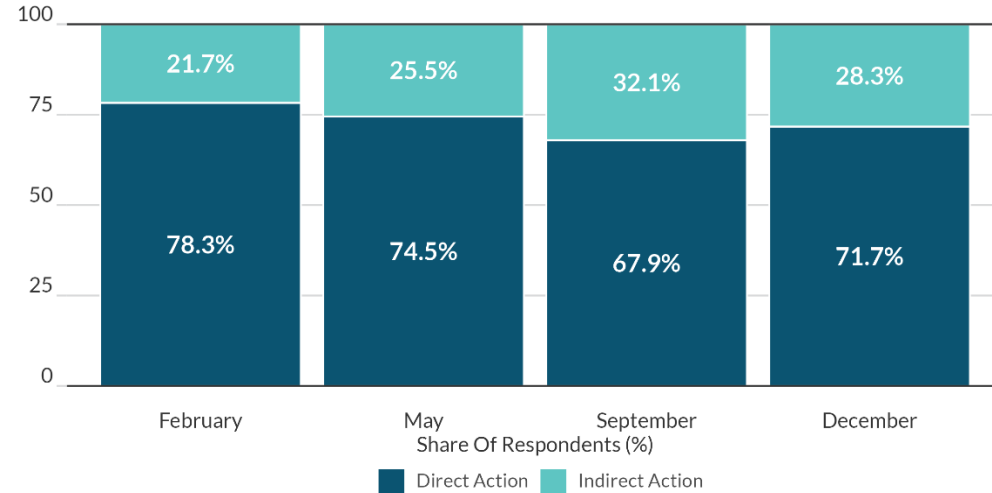

Bar / Column: Stacked (Adding to 100)

Colour Order

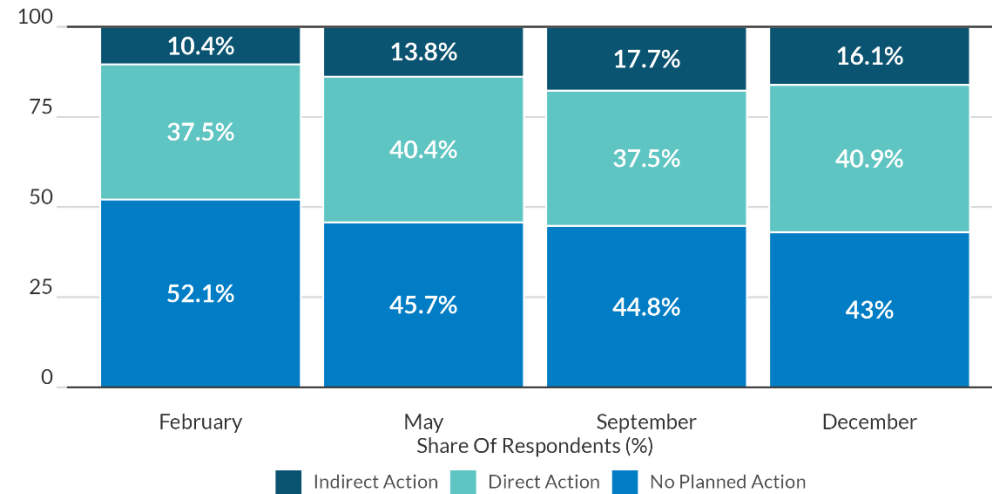

2 Colours

Share of Respondents Planning Direct Action For Wage Increase has Remained Relatively Constant
Share of Respondents Planning Future Action to Seek Higher Earnings

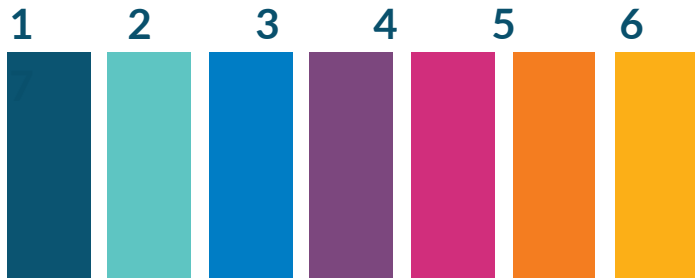

3 Colours

Share of Respondents Planning Direct Action For Wage Increase has Remained Relatively Constant
Share of Respondents Planning Future Action to Seek Higher Earnings

Bar / Column: Stacked

Bar / Column: Stacked

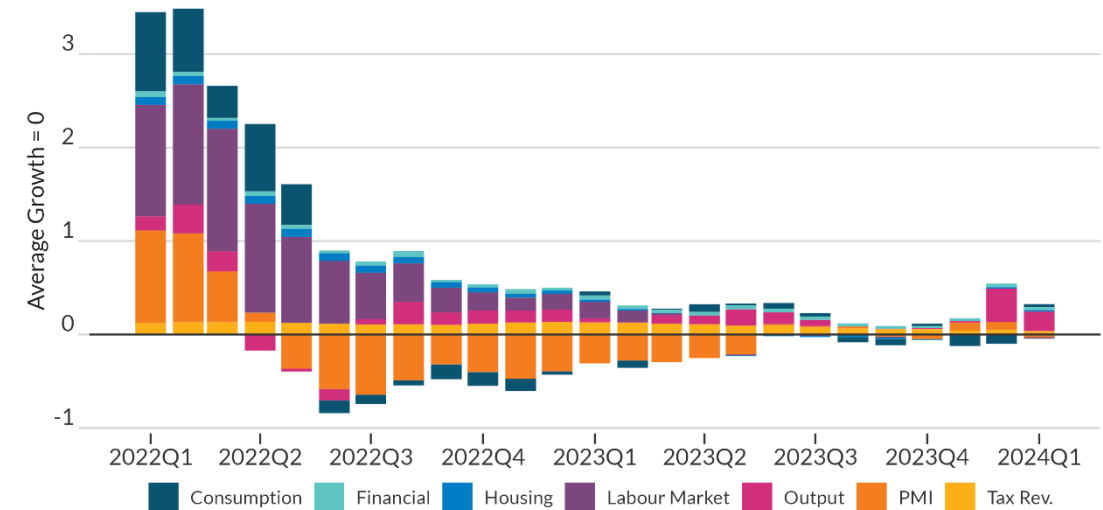

Colour Order

7 Colours

The Underlying Domestic Economy is Likely to ... Grow In Line with its Medium-Term Capacity

Central Bank's Business Cycle Indicator (BCI), (Jan 2022 – Jan 2024)

Note: It is recommended that four is the maximum no. of different colours to use. Anything more makes it difficult to distinguish. Consider using less colours and a light gray to highlight the “Other” category.

... Grow In Line with its Medium-Term Capacity

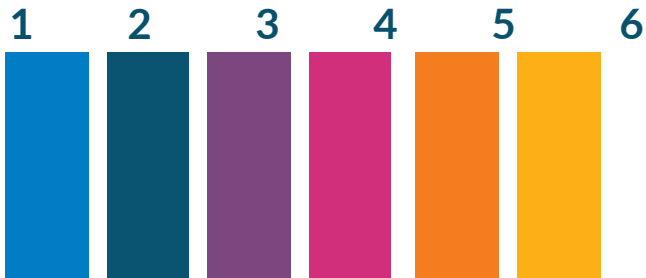

Central Bank's Business Cycle Indicator (BCI), (Jan 2022 – Jan 2024)

Note: The coloured bars are set to 80% transparency as the primary message is to convey the trajectory of BCI.

Bar / Column: Stacked With Ordering

Colour Order

Line Colour

Note: The use of arrows on top is optional. Additionally, the splitting into years on the x-axis is dependent on the key message. Do we want to convey the difference year on year, or just the overall trend?
